The accompanying notes form an integral part of these financial statements.

1. Nature of Operations

The Company was incorporated on August 12, 1998 under the laws of the Province of Ontario.

The Company has interests in mineral properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of expenditures on mineral properties, including deferred exploration expenditures, is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the exploration and the development of the mineral properties, and upon future production or proceeds from the disposition thereof.

2. Summary of Significant Accounting Policies

These financial statements have been prepared in accordance with accounting principles generally accepted in Canada. The significant policies are as follows**:**

a) Going concern assumption

These financial statements have been prepared on the going concern assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, they do not give effect to the adjustments that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts different from those in the accompanying financial statements. The Company's ability to continue as a going concern is dependent upon its ability to attain profitable operations, to arrange financing to meet its current and future obligations and the outcome of the matters discussed in note 13.

b) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates are reviewed periodically and, as adjustments become necessary, they are made in the period in which they become known. Actual results could differ from those estimates

c) Property, plant and equipment

Property, plant and equipment are recorded at cost. Amortization is provided on the diminishing balance method at the following rates:

Computer Equipment	30%
Computer Software	100%
Furniture and equipment	20%

Amortization is provided at one half annual rates in the year of acquisition.

d) Interest in mineral properties

Effective January 1, 2003 the Company adopted the recommendation issued by the Canadian Institute of Chartered Accountants regarding the expensing of exploration expenditures as incurred. Costs attributable to property acquisitions are capitalized while exploration expenditures on the property can only be capitalized once mineral reserves have been established. Once a mineral reserve has been established, all development costs will be capitalized. These costs together with the costs of mining interests will be charged to operations on a unit-of-production method based on estimated recoverable reserves. If the mining interests are abandoned, or when an impairment in value has been determined, the capitalized costs will be charged to operations.

The Company will continue to carry deferred exploration expenditures incurred prior to January 1, 2003 as an asset (note 5); however, when events or changes in circumstances indicate that the carrying amount may not be recoverable, the Company will evaluate the carrying value of the asset and an impairment will be recognized at that time.

e) Translation of foreign currency

Foreign currency denominated monetary assets and liabilities of Canadian operations are translated into Canadian dollars at exchange rates prevailing at the balance sheet date and at exchange rates prevailing at the transaction date for non-monetary items. Revenues and expenses are converted at the average exchange rate for the year. Exchange gains or losses arising from the transaction are included in operations.

2. Summary of Significant Accounting Policies (continued)

f) Income taxes

The Company accounts for income taxes using the asset and liability method. Under this method, future income taxes assets and liabilities are determined based on differences between the financial statement carrying value of existing assets and liabilities and their respective income tax bases (temporary differences), and losses carried forward. Future income tax assets and liabilities are measured using tax rates expected to be in effect when the temporary differences are likely to reverse. The effect on future income tax assets and liabilities of a change in tax rates is included in operations in the period in which the change is substantively enacted. The amount of future income tax assets recognized is limited to the amount that is more likely than not to be realized.

g) Accounting for stock-based compensation

Effective January 1, 2003, the Company adopted, on a prospective basis, the accounting recommendations of the Canadian Institute of Chartered Accountants ("CICA") Handbook Section 3870, "Stock-Based Compensation and other Stock-Based Payments". This section requires the use of the fair-value method to calculate all stock-based compensation associated with granting stock options to employees and directors, and the inclusion of that expense in the statement of operations. Under the new accounting policy, the Company measures stock-based compensation on the date of the grant and recognizes this cost over the vesting period of the options in results of operations.

h) Impairment of long-lived assets

Effective January 1, 2004, the Company adopted the CICA Handbook Section 3063, "Impairment of Long-Lived Assets". This section requires the Company to assess the impairment of long-lived assets, which consist primarily of mineral property, plant and equipment, whenever events or changes in circumstances indicated that the carrying value of an asset may not be recoverable. Recoverability of assets to be held and used are measured by a comparison of the carrying value of the asset to future undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the amount of the impairment is measured by the amount by which the carrying amount of the asset exceeds its fair value.

For the Company, the adoption of CICA Handbook Section 3063 had no impact on results of operations previously presented.

i) Asset retirement obligations

Effective January 1, 2004, the Company adopted the CICA Handbook Section 3110, "Asset Retirement Obligations". This section requires that the fair value of a liability or an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The estimate excludes the residual value of the related assets. The associated retirement costs are capitalized as part of the carrying amount of the long-lived assets and amortized over the life of the asset. The amount of liability is subject to re-measurement at each reporting period. This differs from prior practice which involved accruing for the estimated retirement obligation through annual charges to earnings over the estimated life of the property.

For the Company, the adoption of CICA Handbook Section 3110 had no impact on the results of operation previously presented.

At the present time, the Company has concluded that there are no asset retirement obligations associated with any of the properties.

3. Cash

Included in cash as at June 30, 2007 is $372 of monies received from the issue of flow-through shares ($85,371 – December 31, 2006). The use of these funds is restricted to exploration expenditures.

4. Funds Held In Trust

Funds held in trust represent monies advanced to lawyers.

The share purchase warrants are valued using the Black-Scholes option pricing model with the following assumptions: risk free interest rate of 4.02% (3.85% - 2005); expected volatility of 70% (85% - 2005); expected life of 1 year (1.5 years – 2005) and expected dividend yield of 0%. The fair value of $900 ($137,927 – 2005) has been recognized in the Company's accounts.

7. Capital Stock, Warrants and Stock Options (continued)

t) Stock options.

In August 2001, options to purchase 574,500 common shares were granted to employees and directors at $0.50 per share. As at December 31, 2006, 501,000 (526,000 – 2005) of these options were still outstanding. These remaining options expired on March 27, 2007.

In October 2005, the Company's Board of Directors approved a new stock option plan. Under the terms of the Company's new stock option plan, a maximum of 10% of the issued and outstanding common shares have been reserved for issuance to the Company's directors, officers, employees and eligible consultants. The new stock option plan was approved by the Company's non participatory shareholders on May 24, 2006.

In December 2005, the Company's Board of Directors granted an option to purchase 240,000 common shares at an option price of $0.50 per share to the Company's investor relations firm, subject to non participatory shareholder approval of the stock option plan as disclosed above.

1,325,000			1,325,000

u) Stock based compensation.

In 2006, the company granted 1,165,000 options, 240,000 of which were granted in 2005 subject to shareholder approval. The stock option plan was approved by the shareholders on May 24, 2006. The options granted to employees and non-employees were valued using the Black-Scholes option pricing model with the following assumptions: risk free interest rate between 4.13% and 4.19%; expected volatility of 70%; expected life form 4.5 to 5 years and expected dividend yield of 0%. The fair value of $123,600 has been charged to the statement of loss and offset to contributed surplus.

In May 2007, the Company granted 60,000 options to a director of the company pursuant to its stock option plan. Each option is exercisable into one common share in the capital of the Corporation upon payment of an exercise price of $0.45 per share at any time until May 14, 2012.

In June 2007, the Company granted in aggregate 160,000 options to a director, an officer and an eligible consultant of the company pursuant to its stock option plan. Each option is exercisable into one common share in the capital of the Corporation upon payment of an exercise price of $0.36 per share at any time until June 18, 2012.

8. Income Taxes

Future income taxes reflect the net tax effects on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts for tax purposes.

There is 1 future income tax liability and there are 2 future income tax assets as follows:

	December 31 2006	December 31 2005
Future income tax liability		
Renounced mineral expenditures on flow-through shares	$ (30,694)	$ (486,492)
Future income tax assets

Canadian development and exploration expenditures	84,667	80,213
Total future tax assets	746,906	694,114
Valuation allowance for future tax assets	(716,212)	(207,622)
Future income tax assets	30,694	486,492
Net future income tax liability and assets	$ 0	$ 0

The Company provided a valuation allowance equal to the future tax assets (except for the amount of the non-capital losses equal to offset the future income tax liability in accordance with CICA Handbook EIC-146) because it is not presently more likely than not that they will be realized. The Company's actual income tax (recovery) expense for each of the years ended is made up as follows:

	Year ended December 31 2006	Year ended December 31 2005
Loss before income taxes	$ (1,717,734)	$ (496,987)
Income tax (recovery) at the combined federal and provincial rates of 36.11%	(620,274)	(179,462)

11. Basic and Diluted Loss per Share

The basic and diluted loss per share is computed by dividing the loss by the weighted average number of common shares outstanding during the period. The conversion of stock options was not included in the calculation of diluted loss per share since the calculation would be anti-dilutive.

12. Fair Value of Financial Instruments

At June 30, 2007 and December 31, 2006, the Company estimates that the carrying value of cash, accounts receivable, funds held in trust and accounts payable approximate their fair value due to their immediate or short-term nature.

13. Contingencies and Commitments

At the commencement of the Big Trout Lake project in 1999, the Kitchenuhmaykoosib Inninuwug First Nations ("KI") community informed the Company that it was opposed to any exploration activities on the Big Trout Lake property. The Ontario Ministry of Natural Resources and the Ontario Ministry of Northern Development and Mines have confirmed that the Company has the right to quiet possession of the property and the right to pursue exploration. Until recent developments, KI had consented to low impact exploration, continued consultations and employment opportunities as the project progressed.

In late February, 2006 due to the conduct of members of the Kitchenuhmaykoosib Inninuwug First Nations ("KI") community, and in order to ensure the safety of its on-site workers, Platinex vacated its camp in the Big Trout Lake area and temporarily halted the exploration program on its claims. After Platinex's forced departure, and without its authorization, KI members tore down the camp and removed all items from the site. The Company's efforts to engage the KI community in discussions to resolve the situation have been unsuccessful. Platinex is in the process of seeking injunctive relief against KI, the KI Band Council and others so that it can continue its exploratory drilling without obstruction or interference. The Company also has issued a Statement of Claim against the same parties for damages.

KI aggressively opposed the Company's exploration activities and prevented the Company from its right of quiet possession of the property. The Company sought injunctive relief against KI and others in order to continue its exploration drilling without obstruction or interference.

In late July 2006, the Ontario Superior Court dismissed the company's motion and granted injunctive relief to KI conditional on it establishing a consultation committee to engage in tripartite discussions with Platinex and the Provincial Crown with the objective of developing an agreement to allow Platinex to conduct its exploratory drilling on the Big Trout Lake property. Management was concerned that the Court's July 2006 decision sanctioned the KI unilateral "moratorium" on prospecting and exploration on KI's traditional territory. Minister Ramsay of the Ministry of Natural Resources has stated publicly that the KI "moratorium" has no legal standing. Further, Platinex's activities were based on assurances from the Provincial Government that the Company has the right and the obligation to explore its claims, and the obligation to keep those claims in good standing. Platinex's support in principle for good faith consultations with KI and the Crown notwithstanding, Management determined that it was obliged to continue to preserve and pursue its full legal rights by way of an appeal. Such an appeal has not yet been argued. The Court-mandated tripartite discussions were initiated in August. At KI's insistence, those discussions focused on the development of a consultation protocol. Although Platinex agreed in October 2006 to the terms of the KI-proposed protocol, such a document was never executed and substantive discussions concerning Platinex's exploratory drill program did not take place prior to the Court ordered re-appearance in January 2007.

In January 2007, the parties agreed to extend the injunction order until April 2007 in a further effort to conclude a protocol and reach an agreement on the Platinex drilling. Because KI and the Provincial Government could not come to an agreement on certain issues including the quantum of funding for KI's participation in the consultation, a protocol was not executed and substantive discussions did not commence. On April 2, 3 and 4, 2007, KI argued its motion for an order prohibiting Platinex from conducting any drilling on the Big Trout Lake property until the trial of the main action. Platinex opposed KI's motion. The Provincial Government proposed a Court-supervised process that would allow Platinex to commence its drilling while consultation continued. Platinex supported this proposal. The Court reserved its judgment.

On May 1, 2007, the Court dismissed KI's motion for further injunctive relief and made certain declaratory orders. The May 1, 2007 ruling contemplated that Platinex's drilling program could commence on June 1, 2007 with certain consultation processes in place. By further ruling on May 22, 2007, the Court imposed a consultation protocol, memoradum of understanding and timetable and ordered that Platinex could commence phase one (24 holes) of its exploratory drill program on June 1, 2007.

Since the outcome of certain matters involving the Company and KI over the Big Trout Lake property has yet to be determined, the Company has not made any provision in the financial statements for any loss or impairment in the mining assets or any costs related to this action.
